

Morgan City’s Water Department delivers culinary drinking water to the residents of Morgan City. Our Water Department Staff spends many hours keeping up their certifications to get the most up to date techniques on maintaining the City’s water system to ensure clean and safe drinking water! Morgan City’s water system consists of 4 holding tanks, 3 springs, and 3 wells.

**Drinking Water Source Protection:**

Morgan City understands the importance in protecting our natural resources to improve water quality and lessen the severity and impact of potential contamination to our water sources, therefore we encourage residents to read and review the information posted below under supporting documents that has been provided by the Division of Drinking Water, Source Protection Program.
