February 1, 2018

Morgan City Resident

A Community Wildfire Preparedness Plan (CWPP) aimed at reducing risks from wildfires in your community is being created over the next few months. The plan will cover the Morgan area. This plan will be prepared by a citizen-based committee with the Utah Division of Forestry, Fire and State Lands and the Morgan County Fire Department as technical advisors.

CWPPs are the primary method of planning, preparing and educating residents to reduce the risks and dangers associated with wildfire; they are used to organize and direct individual and community efforts as they prepare for wildfire. Through the utilization of the CWPP process, you can have a direct impact on fire behavior around your home and in your community just as the other 142 CWPPs have done for 199 communities here in Utah.

The CWPP process provides an opportunity for citizen input on planning the response to and prevention of wildfires that will affect their community. It is the committee that will be directly involved in forming plans and procedures for all aspects of wildfire in their community. Therefore, your participation is needed in order for this process to succeed.

The Morgan County Fire Department would like to invite interested citizens of the Morgan City Community to give input and join our Community Wildfire Protection Planning committee. The Meeting is at the Morgan City office located at 90 W Young Street, Morgan City on Thursday, February 15, 2018 at 6:00 pm.

Thank you for your time and we hope to see you there!
